Low weight (see text)

The chart displays weight percentiles for children aged 2 to 20 years. The left y-axis shows weight in kg (5 to 35) and lbs (10 to 75). The right y-axis shows weight in lbs (10 to 105) and kg (5 to 45). The x-axis represents age in years (2 to 20). The red shaded area indicates the 'Low weight' range, which is below the 5th percentile line. The 5th percentile line starts at approximately 10 kg at age 2 and rises to about 25 kg at age 20. The 95th percentile line starts at approximately 15 kg at age 2 and rises to about 75 kg at age 20.

Age (Years)	5th Percentile (kg)	10th Percentile (kg)	25th Percentile (kg)	50th Percentile (kg)	75th Percentile (kg)	90th Percentile (kg)	95th Percentile (kg)
2	10	12	14	16	18	20	22

Low weight (see text)

The chart displays weight-for-age percentiles for children. The x-axis represents age in years from 2 to 20. The left y-axis shows weight in kilograms (kg) from 5 to 35, and the right y-axis shows weight in pounds (lbs) from 10 to 105. Percentile curves are plotted for 5th, 10th, 25th, 50th, 75th, 90th, and 95th percentiles. A shaded red area at the bottom of the chart indicates the 'Low weight' region. The chart also includes a table for recording date, age, weight, stature, and BMI, and a section for notes.
